PROJECTS

CHAT MORE | Social Media Application
Live link | Source Code

OVERVIEW

This social media app, built with HTML, CSS, JavaScript, and React, enables users to create profiles, connect with friends, post updates, and interact with posts. It showcases my front-end development skills.

FEATURES

The app includes user authentication, profiles, an explore feed, post creation, likes and comments, a friend/follow system, responsive design, styling, UI/UX, and API integration.

SHOP MORE | E-commerce Application
Live link | Source Code

OVERVIEW

This e-commerce site, developed with HTML, CSS, JavaScript, and React, enables users to browse products, add to cart, make purchases, and manage profiles. It highlights my front-end skills and e-commerce design expertise.

FEATURES

The website offers product listings, search, filtering, details, a shopping cart, checkout, user registration/login, profiles, payment integration, responsive design, and API integration.
